I am not sure what else you would ask a young bull to do. Light BW top 1%, great growth top 15%, excellent carcass top 1% on IMF, big scrotal and top 1-2% for all 4 breed indexes and he did all this in a contemporary group of 93 head. Add to that, his sire, maternal sire and maternal grand sire have all been tested in multiple reference sire tests with now high EPD accuracies. Physically, his dam is a typical Progress daughter, deep ribbed, beautiful udder and teat placement and quick to rebred. I really believe this is the future. Terms to be announced.

2 years ago, Limelight's sire, Wonder caused quit a stir. I believe because of the cow family this bull is out of, Limelight is the next step. The Phoenix daughter, U21, is a daughter maternal sister to Rib Eye. U21 and her full sister, U29 have both been flushed her at SHF. Tight udders with short well placed teats are staples of the cow family. Limelight was the lead bull for us in our Res. Champ pen in Denver this year. Limelight has a bright future her at SHF.
