March 31, 2017 - 1 p.m.

Selling 125 Bulls and 15 Proven Females

**Also Selling 45 Commercial Hereford Heifers, 15 Commercial BB
Open Heifers, and 5 Red Baldie Heifers**

*Unlock Their Future Potential
With Genetically Enhanced EPD's*

Visit *sandhillfarms.com*
or call (620)995-4072 for
information on sale cattle and videos of the sale bulls.

Real World Proof!

Kevin,

I am assuming you like to look at data results as much as I do. The carcass results for thirty May-June 2015 born steers did well. The Hereford bull we purchased from you (SHF Kaleb R117) did an excellent job for us. Every year his calves were the heaviest weaning sire group and his daughters are making great mothers. We have fifty plus replacement out of him....they are the right kind. He was a great breeding bull. We retired him this year....he bred himself out of a job!

The Kaleb bull will be known to us as a bull that contributed a much higher value than the price we paid!

Klausmeyer K3 Angus

Clearwater, Kansas

Repeat Buyer Credit Policy

We offer a "repeat buyer credit policy". If you purchased a registered animal from us in last years sale, you will receive 5% off your total purchase in this years' sale.

This policy will be ongoing and will apply to next years sale. The discount is determined after all credits have been subtracted from the gross purchase price.

www.sandhillfarms.com

Dear Friends,

As we work to put together our sale offering, we would be greatly honored to have you with us for our sale on March 31st.

Our family has again expanded this year. Brooke and Travis had a little boy, Silas Randall, on November 4th. Tyler and Hannah were married December 31st. Courtney and JD are engaged to be married on July 8th.

We have been working on this breeding program for over 30 years. It is present in this set of cattle we offer to you. Our program goals are balanced trait cattle that will give you flexibility for different marketing goals. Maternal traits, growth, calving ease and carcass merit are just a few of the traits we have worked diligently to make sure each and every bull and female has a balance of them all.

We have several ways to help you market your cattle. There are feed yards that are interested in feeding these cattle. We are a Superior Genetic Supplier. Just recently rolled out, is the new Hereford Advantage program. Basically, if the Hereford sired calves you are getting ready to sell are sired by a bull battery with an average of the top 20% CHB value, currently that value is 28, your calves will qualify for marketing assistance provided by the American Hereford Association. We will assist with you filling out the forms, so, call any time you have questions. Remember, it is an average of your Hereford bulls. 87% of the bulls in our sale have a value greater than 28.

We understand that extremes don't always reflect function. A rigid culling program is just as important as a designed breeding program. When you buy our genetics, you are benefiting from both.

Sincerely,

Kevin and Tyler Schultz

Cattle will sell in lot order.

Located near Trousdale. See map.

Inspection of cattle: The cattle will be available for inspection any time prior to sale at Sandhill Farms.

Serving beef stew Thursday night. A complimentary lunch will be available on sale day along with donuts and coffee on Friday morning.

Note: Sandhill Farms reserves the right to a ¼ semen interest on all sale bulls with the exception of a ½ semen interest in Lots 1, 2, 3, 4, 5, 6, 7, 10, 12, 13 and 15. These bulls will be marked.

All of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com and www.sandhillfarms.com

Terms and Conditions

Delivery: Free delivery on registered bulls and cows to central points in the U.S. \$75 off per bull you haul. No delivery on the heifers.

Guarantee: We guarantee that all breeding cattle, both females and bulls, are fertile to the best of our knowledge. If they are injured any time in the 12 months after they are purchased so as to make them functionally infertile, we will provide you with a satisfactory replacement, if available, or issue you credit equal to your purchase minus salvage value.

Sight Unseen Guarantee: Just like when we sold bulls private treaty, we will guarantee your satisfaction of the bulls we purchase for you. If you don't feel like the bull was represented accurately after he has been at your place, let us know and all you will pay is the trucking. We will take the bull back. You must talk to us at Sandhill Farms so we can help match you up with the best bulls for you prior to the sale.

Health: All bulls have been fertility tested by Dr. Mike Burdett of Larned Veterinary Clinic and passed. They were also vaccinated with Staybred VL5 and poured with ivermectin. All cattle have been tested negative for PI BVD. At weaning, the bulls and

Wichita is located 100 miles east of Sandhill Farms and is served by major airline carriers. Dodge City is located 60 miles west of Sandhill Farms and is a regional airport.

heifers were vaccinated and boosted with Bovishield Gold 5, Presponse SQ and Vision 7. The heifers were vaccinated with Bovishield Gold FP 5 VL5 and poured with ivermectin. Herd health is excellent. Individual health papers will be provided for shipment anywhere.

Bull Development: The bulls were creep fed on grass in late summer. After weaning, they have been grazing on wheat or annual rye pasture when available. Silage and 8 lb. of grain have also been fed.

Announcements: Check our Web site for updated information at www.sandhillfarms.com.

Liability: Any person attending the sale does so at his own risk. The sale management, owners nor any person connected with this sale do not assume any liability, legal or otherwise.

Registrations/Transfers: Registration certificates will be transferred to the buyer upon request at the seller's expense. When making settlement, buyers must give complete written name and address.

Insurance: Insurance will be available sale day for those wishing to purchase it. Please tell the clerk when settling up. Sheila Jensen, Livestock Insurance Agent 785-374-4372.

Glossary of Performance Terms

We are going to give you all the data we can gather and let you decide which bulls will fit in your program the best.

- Expected Progeny Difference (EPD) — The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed from the same database. EPDs are expressed in units of measure for the trait, plus or minus. EPDs are not to be compared between breeds.
- ACC — Accuracy is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability.
- Birth wt. — The actual weight in pounds at birth.
- CE — Calving-Ease Score: 1= unassisted; 2= some assistance; 3=mechanical assistance.
- Adj. WW — Weaning weight adjusted to 205-days of age and adjusted for age of dam.
- Adj. YW — Yearling weight adjusted to 365-days of age and adjusted for age of dam.
- Weight Ratio — A direct comparison of one calf to all other calves in his contemporary group. 105 means that the calf performed 5% above group average for that trait and a 95 ratio indicates that the calf is 5% below group average for that trait.
- Contemporary Group — A group of cattle about the same age and given equal treatment.

Growth EPDs

- Birth Wt. EPD (BW) — Birth weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Weaning Wt. EPD (WW) — Weaning weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Yearling Wt. EPD (YW) — Yearling weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Scrotal Circumference (SC) — Expressed in centimeters, this is a predictor of the difference in transmitting scrotal size compared to other animals from the same breed or database.

Maternal EPDs

- Maternal Milk (MM) — A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires.
- Milk & Growth (M&G) — A predictor of a sire's daughters for milk and growth. In other words, it is that part of a calf's weaning weight attributed to milk and genetics for growth.
- Udder Suspension and Teat Size — UDDR EPDs are reported on the scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. Higher number is more desirable.

Carcass EPDs

- Back Fat (Fat) — A predictor of the difference in external fat thickness at the 12th rib.
- Rib Eye Area (REA) — A predictor of the difference in ribeye area.
- Marbling (MARB) — A predictor of the difference in intramuscular fat.

Breed Indexes

- Baldy Maternal Index (BMI) — Combination of weighted traits that affect the bottom line when mating the Hereford bull on black cows.
- Calving Ease Index (CEZ) — Animal's potential for use on heifers.
- Brahman Influence Index (BI) — Similar to BMI index, but weighted heavier for traits that will make Brahman cattle more profitable.
- Certified Hereford Beef Index (CHB) — Animal's ability to perform in the feedlot and on the rail.

Ultrasound Adjusted Measurements

- Adj. % MARB — The percent intramuscular fat (marbling) adjusted to 365-days of age. Heritability for marbling is in the moderate range. The intramuscular fat in longissimus muscle of ribbed carcasses is the principal determinant of USDA quality grade in cattle slaughtered at less than 30-months of age. Heifers and steers in the 4% range of MARB will be close to making the Choice grade. Bulls if they were steers with a 3% MARB will also be close to the Choice grade. The difference is the influence of testosterone in the bulls' system.
- Adj. REA — Each bull's ribeye area measured in square inches and adjusted to one year of age. REA is used in the calculation of yield grade.
- Adj. Backfat — This is the backfat measured in inches adjusted to 365-days of age. The BF thickness is directly related to the carcass yield grade.
- Rib Eye/ cwt. — The is the adjusted REA divided by the hundred weight of the bull. The weight of the animal, which is affected by fill, body condition and others, can change this ratio greatly.

Dam's and/or Progeny Production Records

- Birth Weight Ratio (BWR) — The number of calves a dam has had and their average birth wt. ratio. Example: 2-98 means the dam has had 2 calves with an average BWR of 98.
- Weaning Weight Ratio (WWR) — The number of calves a dam has had and their average weaning weight ratio. Example: 2-102 means the dam has had 2 calves with an average WWR of 102.
- Yearling Weight Ratio (YWR) — The number of calves a dam has had and their average yearling weight ratio. Example: 2-103 means the dam has had 2 calves with an average YWR of 103.
- Marbling Ratio (MARBR) — The number of calves a dam has had and their average wt. ratio. Example: 2-98 means the dam has had 2 calves with an average MARB of 98.
- Rib Eye Ratio (REAR) — The number of calves a dam has had and their average ratio. Example: 2-102 means the dam has had 2 calves with an average REA of 102.
- Fat Ratio (FATR) — The number of calves a dam has had and their average ratio. Example: 2-103 means the dam has had 2 calves with an average FAT of 103.
- DOB: Date of birth
- H/P/S/D: — Horned/Polled/Scurred/Dehorned

- Like Rib Eye, we don't have any sons selling in the sale this year. We do have a couple daughters. However, Wonder's influence in the nation's herd is growing.
- Many bulls in the sale trace back to Wonder, his full sisters or his dam.
- Semen is no longer available.

SHF WONDER M326 W18 ET

W04 — Full sister to Wonder

* 87% of Sale Bulls qualify for this program and are marked individually

STAND OUT WITH PROVEN GENETICS

HEREFORD ADVANTAGE PROGRAM

Look to the Hereford Advantage Program to give you more marketing power. This program highlights producers buying the right kind of genetics to ensure profitable feeder cattle both at the bunk and on the rail. To qualify the bull battery that your calf crop is sired by needs to average a 28 or higher for Dollar Certified Hereford Beef (\$CHB). \$CHB is a valuable selection index that includes traits for growth, efficiency and end product merit. Rather than trying to look at multiple traits the \$CHB index simplifies them all into one economically weighted index that is ultimately driven for bottom-line profit.

PERCENTILE	\$CHB
Top Value	50
Top 1%	36
Top 5 %	32
Top 10%	30
Top 15%	29
Top 20%	28
Top 25%	27
Top 30%	26

Sandhill Farms...committed to commercial producers profitability

Sandhill Farms genetics qualify for the "Progressive Genetics" program when selling your cattle with Superior Livestock.

Contact Superior Livestock or Sandhill Farms for more information.

Contact us for more information and assistance.

**We realize that Calving Ease is one of the most valuable traits.
We guarantee all of our sale bulls to your satisfaction. Period.**

Lot 1 — SHF DYNASTY Z311 D20 ET

- This son of Encore is out of Y35. She is the dam of four impressive sons in four consecutive years, SHF Access A216, SHF Brock B24 and SHF Cannon C95. Dynasty is in line to have a major impact on your herd. He ranks in the top 1% of the breed for growth, IMF and ultimately all around carcass value, CHBS. We believe that Dynasty has the cow family and individual merit to be a breed leader.
- Tested Homozygous polled. Selling full possession, 50% semen interest.

Lot 2 — SHF DEADBOLT 001A D163

- Deadbolt will be an all-around herd sire for whomever is fortunate to get this bull. A Calving Ease Direct of 7+ and a actual REA of over 15 sq. in. The cow family may be the best part of Deadbolt. His dam has consistently scored a perfect 9 for teat size and udder with progeny ratios of 114.5 for IMF and 118 for REA. Study your lesson on this bull.
- Homozygous polled pending. Selling full possession, 50% semen interest.

- Double Play is another impressive son of Anodyne. Probably should be renamed Triple Play as he has 1. calving ease, 2. top 10% of the breed growth and 3. top 1% IMF and CHB\$ values. If you want to talk cow family, his dam W26 has been a top producing female for us and impressive donor. Double Play is a full brother to one of our top selling bulls last year, SHF Impact. Full brother sells as Lot 60.
- Homozygous polled pending. Selling full possession, 50% semen interest.

- Database is an Anodyne son out of one of my favorite cows, A278. She is a Tug daughter out of a Progress cow. This bottom side is reliable and proven, then add the calving ease and performance of Anodyne, you have something special. This is a "spread bull" that will be fun to own and work in your cow herd.
- Selling full possession, 50% semen interest.

- Design had an impressive set of EPDs prior to scanning, but then he came in with a 120 ratio for IMF. His BMI\$ and CHB\$ value rank him in the top 1% of the breed with a cow family that makes him a valuable herd sire prospect. His dam is sired by SHF Tug. Tug was Lot 1 in our very first sale 10 years ago. His daughters are among some of my favorites. Tug fixes udders. The dam of Design, Y54, is also the dam of herd sire SHF All American. Maternal brothers sell as Lots 22 and 47.
- Homozygous polled pending. Selling full possession, 50% semen interest.

- Doc may just be what the doctor ordered. Started out with a actual 78 lb. BW and then adjusted to over 1,200 lb. YW. More important, his 6.1 CED combined with his 106 YW places him in the top 3% of the breed for both. That is the definition of a "spread bull." Cow family traces back to a great producing M326 daughter.
- Homozygous polled pending. Selling full possession, 50% semen interest.

- D.J. started out with a low 63 lb. BW. That helped his CED and BW make top of the breed calving ease. Then realize he had over a 14 in. REA. Pretty impressive. His dam is a Wonder daughter that is out of 1T. 1T is a donor that will leave a positive mark on our herd for many generations of great functional cattle.

- As we get deeper into the All Star genetics, I believe these cattle will be respected and demanded more all the time. Die Hard is one of these sons. Top of the breed indexes and some outstanding udder and teat EPDs. His dam is a Literal daughter with U48 to back that up. She is a donor currently working for Sara Frueh in Missouri.
- Homozygous polled pending. Selling full possession, 50% semen interest.

- If you are here to find a performance bull, you will want to search out Dance. He has one of the top YW EPDs and CHB\$ index values in the breed. With his adj. YW of over 1,460 lb., this bull brings top carcass weight and yet ranks in the top 2% of the breed for IMF. His dam, A10, is a perfect 9 for udder scores and she traces back to a full sister to Wonder.

SHF MAGGIE W193 Z14 — Dam of Lot 21

- Last year in the sale, the sons of Z210 were highly sought after. They have calving ease, muscle, volume and are very sound. This year's set are much the same. This bull started with a 75 act. BW and will make someone a great heifer bull. His dam is a daughter of Wyatt. Wyatt has made some very good daughters for us and I believe this bull will sire the same.

- Duke is a negative BW bull the puts him in the top 1% of the breed for calving ease. Combine that with some above breed average growth and that is why the breed indexes are so impressive. His dam is a very tight uddered, good cow.

- Several years ago, the sire of this bull, Major, was one of the top sires to be tested in the National Reference Sire Program. We now have daughters in production and they are very good. This bull is stacked with udder quality.

- Dollar Bill will add pounds to your calf crop and therefore, dollar bills to your bank account. He ranks in the top 10% for growth, and ratioed 107 for REA. Several cows in the pedigree have proven to me that this bull will sire longevity as well.

- Durrant is a negative BW EPD bull. Here is another heifer calving specialist.

Over the past few years, the American Hereford Association (AHA) has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into Pan American Cattle Evaluation (PACE) to enhance the predictive power of EPD. Genomic Enhanced EPD (GE-EPD) allow commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information on Hereford Genetics. The current AHA test is a Low Density (LD) panel that was built off of a High Density (HD) panel and training was done utilizing high accuracy Hereford sires. Each animal that is tested has an updated set of EPD and corresponding accuracy. The AHA currently has over 25,000 animals genotyped. For some traits, the added accuracy will increase by a 100% and moving from .15 to over .30 which means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed (table below). The use of this information reduces your risk when buying, and helps to plan matings based off of all information available.

Each animal tested is
recognized with the
AHA GE-EPD logo.

AHA Trait	EPD Acc. (BIF)	MBV and EPD Correlation	Enhanced BIF Acc.	Effective Progeny Added

SANDHILL FARMS FEMALES

A few notes about the registered cows selling.

- We are selling all the 5-year-old cows that have been ultrasound checked to be carrying a heifer calf.
- I feel we can offer a no-holes, predictable female package with many future productive years.

The thinking behind this program is:

1. We will be keeping all of our registered heifer calves, thus we can turn our generations faster in the cow herd.
2. We will have time to identify the donors, flush embryos and use the genetics from these cows for our future, then offer them to you.
3. By selling cows with heifer calves, we can have some stability in our cow herd and gather data on the bulls for the following year's sale.
4. We will identify the bottom end of the cows and cull for any reason necessary.
5. These cows will sell with complete performance and ultrasound records.
6. We will be giving you the opportunity to purchase the very top end of these young cows.

Lot 122 — SHF MAGGIE LG Z161

- Z161 is a cow that we will miss. She is a clean cut, feminine cow that carries plenty of power and performance. Her teat size is good and she has consistently raised a good calf. She has been a donor for us and will be a good donor for you. With this year's calves being Lots 10 and 17, you know she is doing lots of things right. Her three embryo daughters are some of our top replacements this year. She has been flushed 2x with an average of 12 embryos.
- Will calve by sale date to SHF Zane X51 Z115.

- This cow is a product of a cow family that has had a huge impact on our herd. Her pedigree is stacked with cows we have flushed. This pigmented, freckle-faced cow has good udders and is functional with longevity. With SHF Wonder semen unavailable, here is your chance to get his genetics in a package deal that is in her prime, ready to make a vital genetic impact in your herd. She will be missed. Son sells as Lot 23.
- Will calve prior to sale day to SHF Zane X51 Z115.

- Here is one of our favorite Logic daughters. She ranks in the top 5% of the breed in CED and has shown that in her birth weight ratios, as well as maintaining her top 20% YW EPD. We took her natural calf and her embryo son to the Denver stock show this year as pen bulls. You will have plenty of breeding options with her as an addition to your herd, as she has put calving ease, power and performance to each mating we have used. Her sons are Lots 7, 9 and 99. She has been flushed 2x for an average of 6.5 embryos.
- Calved 2-17 to SHF Zane X51 Z115.

- Calved 2-18 to SHF Consultant Z210 C36

SANDHILL FARMS COMMERCIAL HEIFERS

These commercial Hereford heifers are out of the heart of our commercial herd.

Our commercial Hereford herd was started in the mid-1940s by my grandfather, Roy Schultz and continued by Dad, Ron Schultz.

We are happy to have a group of black baldie heifers from one of our long time customers, /EV Ranch from Rifle, Colorado. These are younger than ours, about 1 to 2 months, and were raised in the western edge of Colorado. The genetics in these heifers is a combination of SHF and GAR, Gardiner Angus Ranch, from Ashland.

/EV Ranch is a 70-year-old ranch in Northwestern Colorado near the town of Meeker and has been focused on raising the highest quality, commercially-bred black baldie replacement heifers since 1986. The ranch has 1,000 commercial cows and utilizes Sandhill Farms Hereford and Gardiner Angus.

Bulls with low BW, high growth and moderate frame EPDs. The ranch offers approximately 150 baldie replacements per year. The set of 15 present is a top sort of this 150 and additional heifers are available at the ranch via private treaty.

For more information, please contact Ty Schultz 425-749-1007.

Real World Proof!

*CARCASS MERIT

Using SHF bulls, 82% of David Ranch calves were in the upper 2/3 choice and qualified for premium carcass merit matching their solid black calves.

*CALVING EASE

Using SHF bulls, Schepmann Ranch calved out 600 heifers and had less calving difficulties than other breeds they used.

*PERFORMANCE

Using SHF bulls, Jay and Amy Derley's calves averaged 108 lbs heavier at a year of age netting \$228.14
